

Dear Friends,

*I would like to take a moment and share with you a recent event in which we recognized one of Florida's greatest governors with the naming of a state of the art and innovative facility, "The Jeb Bush Education Center." This event was held in the City of Hialeah on September 16, 2008. The school will serve as a training ground for students to gain both a formal high school diploma and the necessary technical skills to be the leaders of tomorrow as police officers, fire fighters, and emergency communications personnel. "This is a culmination of resources as we have police officers, fire fighters, and teachers all together to inspire the next generation in a different way," said former Governor Jeb Bush.*

*We have to customize our children's education, and therefore, we are hoping this school will serve as part of the solution.*

Thank you,

Julio Robaina
